

Softage Java team profile

Experience Summary

Since the inception Softage has formed specialized Java team. All developers have solid educational background (Novosibirsk State University) and rich work experience in Java technologies (3 years+).

Softage Java team develops the following applications:

- Desktop
- Client-server
- Web
- Distributed Enterprise (N-tier) applications

Industries: Financial, Telecommunication, E-commerce, Science (microbiology).

Tools and technologies summary

Java

Sun JDK 1.1.x, 1.2.x, 1.3.x, 1.4.x, 1.5.x
IBM JDK 1.2.x, 1.3.x

J2EE specification: 1.2, 1.3, 1.4, 1.5

EJB: 1.0, 1.1, 2.0, 2.1
JSP: 1.0, 1.1, 1.2
Servlets: 2.0, 2.1, 2.2, 2.3

J2EE Application servers:

JBoss 2.x, 3.x, 4.x
BEA WebLogic Server 7.0, 8.0
IBM WebSphere Advanced Server 3.5, 4.0.x, 5.0,

J2EE application framework:

Spring framework 1.2

JSP/Servlet containers:

Tomcat 3.x, 4.x, 5.x
Caucho Resin 2.x
Jetty 4.2.x
WebSphere 3.5 Standard edition

Web development frameworks:

Apache Jakarta Velocity 1.4
Jakarta Struts 1.x
Jakarta Tapestry 3.x
WebSphere Portal Server 4.x
NextApp Echo2 Framework (AJAX) 1.x, 2.x

Enterprise Application integration services:

Flash remoting for J2EE
IBM MQSeries 1.x
IBM CrossWorlds/InterChange Server

SOAP (Apache Axis, Apache SOAP)

Object\relational persistence tools:

Hibernate 2.x, 3.x

Testing tools:

JUnit 2.x, 3.x, 4.x

Report tools:

JasperReports 1.x
JFreeChart 1.x

Build tools:

Ant 1.x
XDoclet 1.2.x

IDEs:

IntelliJ IDEA 2.x, 3.x, 4.x, 5.x, 6.x
Borland JBuilder 4.x, 5.x, 6.x, 7.x, 8.x, 9.x, X
Eclipse 1.x, 2.x, 3.x
Visual Age 3.0, 4.0
WebSphere Studio Application Developer 4.x, 5.0

Database systems:

IBM DB2 UDB 7.x, 8.1
Microsoft SQL Server 6.5, 7.0, 2000
Oracle 8.x, 9.x, 10.x
InterBase 5.x, 6.x, 7.x
Firebird 1.x
MySQL 3.x, 4.x, 5.x

Methodology:

Softage employs own Software Engineering Process based on the Rational Unified Process - industrial standard for software development.

Documentation of all system design activities is performed using UML models. MagicDraw UML and Sparx Enterprise Architect are used as UML modeling tools.

Our professionals have clear understanding of software design process - all our systems are designed for future extensibility and easy maintainability.
